Here is your chance to become rich and famous! Well, maybe not rich, but certainly famous.

The editorial board of PSR (Packet Status Register, TAPR's quarterly newsletter) is now soliciting articles, news items, etc. for the next issue (the pre-Hamvention issue) of the newsletter. Topics related to digital Amateur Radio will be given preference and the editorial board reserves the right to determine what is suitable for publication.

E-mail your contributions to wa1lou@tapr.org; the deadline for the next issue of the newsletter is April 15.

7. [tapr-announce] openHPSDR "Hermes" Interest List Now Open

Newsgroup: rec.radio.amateur.digital.misc
Date: 2012-03-22 19:24:17 UTC
From: John Ackermann N8UR <jra@febo.com>
Message-ID: <4F6B7B64.8090004@febo.com>
Source record: 187
Cross-posted to: rec.radio.amateur.digital.misc,rec.radio.info

PRESS RELEASE

18 March, 2012 (Richardson, TX) TAPR (tapr.org) announces the opening

of the interest list for the openHPSDR (openhpsdr.org) Hermes

single-board SDR. The Hermes interest list is used by TAPR to determine

the number of Hermes boards to manufacture in the pending initial

production run this spring.

Hermes is a long-awaited addition to the openHPSDR project lineup,

advancing through four prototypes while evolving from a USBbased to an

Ethernet-based transceiver in about two years. Hermes is a

Direct-Down-Conversion receiver, a Direct-Up-Conversion 500mW

transmitter and a gigabit Ethernet interface all on one board. Also on

board is an RF-quiet switch-mode power supply, allowing Hermes to run

from a single 13.8V DC supply.

More information can be found on the Hermes Wiki:

http://openhpsdr.org/wiki/index.php?title=HERMES

To show your interest, you can sign up here:

8. Digital net schedules

Newsgroup: rec.radio.amateur.digital.misc
Date: 2012-04-04 18:01:31 UTC
From: mcjason <mcjason@gmail.com>
Message-ID: <dfd09c0e-16e7-44f7-815f-f40979ec8d7b@l4g2000vbt.googlegroups.com>
Source record: 188

I wonder why not this as an idea...

regular broadcasts in digital mode of amateur dx net schedules?

someone oughta collect when their times are and make a regular
digital
broadcast... just incase you live in the boonies with no internet :)

wouldn't that make sense too for how to find where clear frequencies
are?
like, technically?

9. [tapr-announce] PSR Spring Deadline Looms

The next issue of TAPR's quarterly newsletter, PSR, is the works and
this is a call for contributions to the pre-DCC installment of the
newsletter.

Anything digital and radio related are potential PSR articles.

Write about...

...Your latest hardware or software project.

...Your experience with TAPR HPSDR projects.

...Your experience with TAPR timing projects.

...Your past Hamvention experience.

...Your past DCC experience.

...You write it and we may publish it

By the way, every article you write that we publish extends your TAPR
membership by three months!

The deadline for the next PSR is August 15. Please write early and write
often.

73,

WA1LOU - your PSR editor

Message-ID: <500561FC.90801@febo.com>
Source record: 195
Cross-posted to: rec.radio.amateur.digital.misc,rec.radio.info

TAPR is pleased to announce that Hermes, an HF transceiver incorporating
the capabilities of the existing "Atlas Bus" HPSDR receiver, exciter,
and computer interface onto a single board, is now available for order
at http://tapr.org/kits_hermes.html

The Hermes board is completely assembled and tested, and is offered at
the following prices.

TAPR member: $895
TAPR non-member: $940

The order page will close Wednesday July 25th, so don't delay!

Please note that TAPR will be building only one production run of Hermes
boards, and will only build the number necessary to fulfill the orders
received on or before before the July 25th cutoff date.

Estimated delivery is October 15, and earlier if possible. Be a part of
history and support HPSDR!

More information here: http://openhpsdr.org/wiki/index.php?title=HERMES

I'm wondering if you are a ham radio listener or a ham radio operator?

If you have a transceiver and a computer, you can link the two and down
load a program and read what is being sent, and the program can identify
which mode is being used.

I'm not sure if a ham radio receiver has the same data port - so I
cannot comment without knowing more about your station...

18. [tapr-announce] John Bennett, N4XI, SK

Newsgroup: rec.radio.amateur.digital.misc
Date: 2012-07-23 17:53:50 UTC
From: John Ackermann N8UR <jra@febo.com>
Message-ID: <500D8F79.8010706@febo.com>
Source record: 198
Cross-posted to: rec.radio.amateur.digital.misc,rec.radio.info

TAPR remembers John Bennett, N4XI, who died Sunday morning, July 22
after a year-long bout with cancer.

A long-time member of TAPR, John created kits that interfaced with the
TAPR T-238+ APRS Weather Station and his own Linux-based WXN weather
server over APRS. His kits included the X1W-1 1-wire weather sensor, the
X1W-2 outdoor humidity and temperature sensors, and the X1W-2 EMP sensor.

John was a regular at TAPR's Dayton Hamvention booth and on the TAPR
WXSIG patiently handling all questions concerning his kits and weather
stations, in general.

This past May, John dropped by the TAPR Hamvention booth briefly just to
say "Hello" to his old friends at TAPR.

TAPR now says, "Goodbye, old friend."

========

John A. Barnett
Evansville, IN
John A. Bennett, 65, of Evansville, passed away at 1:15 am, Sunday, July
22, 2012 at VNA Charlier Hospice Center. John was born July 4, 1947 in
Washington, D.C. to Wilmer and Miriam (Souther) Bennett. He graduated
from the University of Evansville with a Bachelor's Degree and received
a Master's Degree from Murray State University, both in Music Education.
John was a member of Phi Mu Alpha Sinfonia Professional Mens Music
Fraternity and the American Guild of Organists. John worked at ITT
Technical Institute for 23 years as an instructor and as the Chair of
the School of Information Technology. He also worked 6 years at WEVV
Channel 44 as Chief Engineer. John was a Ham Radio Operator, Extra
Class, with a special interest in digital communications. He was a
charter member of the Evansville Bicycle Club and an avid cyclist. John
was a member of the French Lick Historic Railroad Society and an amateur
photographer. He was a member of Trinity Anglican Church, where he
served as a Vestry member and on the Building Committee.

He is survived by his mother, Miriam R. Bennett of Evansville, IN;
cousins, Lynn M. Souther Schlick of Birmingham, AL, Ryan R. Souther of
Fredrick, MD, Roger C. Ward of Phoenix, AZ, John Chambers of FL,
Geraldine Chambers Livingston of Adamstown, MD, David White of Adelphi,
MD, Elizabeth E. Souther Middleton of Cypress, TX, Susan White Goldsmith
of New Market, MD, Ellen Souther Lynch of San Antonio, TX, Cindy Brown
Hall of Stevensville, MD, Timothy White of Glen Burnie, MD and Charles
Brown of Mt. Airy, MD. He was preceded in death by his father, Wilmer

Bennett.

Funeral Services will be held at 10 am, Wednesday, July 25, 2012 at Trinity Anglican Church at Shepherd of the Hills Lutheran Church, 3600 Oak Hill Road, Evansville with Reverend David S. Straw officiating. Burial will be in Rose Hill Cemetery in Newburgh, IN. Friends may call from 3 pm until 8 pm, Tuesday, July 24, 2012 at Boone Funeral Home - East Chapel and from 9 am until 9:30 am, Wednesday, at Trinity Anglican Church.

Memorial Contributions may be made to: LIVESTRONG, 2201 E. Sixth Street, Austin, TX 78702 or VNA Charlier Hospice Center, 610 East Walnut Street, Evansville, IN 47708. Condolences may be made to the family online at boonefuneralhome.net.

Mark your calendar and start making plans to attend the premier technical conference of the year, the 31st Annual ARRL and TAPR Digital Communications Conference to be held in Atlanta, Georgia, on September 21-23, 2012, at the Sheraton Gateway Hotel Atlanta Airport.

We're thrilled to be bringing the DCC to Atlanta for the first time!

If you're one of the many hams interested in D-Star, APRS or other packet radio operation, Software Defined Radios, HF data or digital voice modes, digital TV, or any other activity combining computer and radio technology, you'll find something at the DCC for you.

The ARRL and TAPR Digital Communications Conference is an international forum for radio amateurs to meet, publish their work, and present new ideas and techniques. Presenters and attendees will have the opportunity to exchange ideas and learn about recent hardware and software advances, theories, experimental results, and practical applications.

And, you don't need to be an expert to attend -- in addition to papers on cutting-edge topics, there will also be a track of introductory sessions including D-Star, APRS, and HF digital modes.

The DCC runs all day on Friday, Sep. 21 and Saturday, Sep. 22, with an in-depth seminar on using open source Gnuradio software to turn your laptop into an SDR on Sunday morning, Sep. 23. There will be a social event Friday evening and a banquet dinner on Saturday.

More details, including a preliminary schedule of events and a link to the registration form, are at:

http://www.tapr.org/dcc

You may register for one, two, or all three days. Advance registration for attendance is not required, but is discounted from event-day prices. Tickets for meals must be purchased in advance.

If you have questions about the DCC, please contact John, N8UR, at jra@febo.com.

21. Packet Radio

Newsgroup: rec.radio.amateur.digital.misc
Date: 2012-08-15 15:27:07 UTC
From: billg999@cs.uofs.edu
Message-ID: <a91teaFuu1U1@mid.individual.net>
Source record: 101

This group seems as dead as the 2 Meter Packet Frequencies around here
but I'll ask here anyway.

Is packet radio dead? Has the proliferation of Internet and Cell Phones
made it so meaningless that no one is doing anything anymore?

I have been pretty much out of Ham Radio for a long time but now
that retirement has reared it's ugly(?) head I find myself with
time and a renewed interest.

I am monitoring all the 2 Meter Packet Freqs here (in the home of
K3RLI) and hearing nothing. Not even the dubious DX Cluster traffic
that used to go on around here!!

Is there any interest in old fashined packet radio any more or should
I just put it all back in a box and relegate it to the cellar once more?

Oh yeah, Is Howie Goldstein, N2WX around here by any chance? I would
still like to get a copy of the source for the "Howie Code" that ran
in my DR-200's back in my digi-peating days. And a copy for the TNC-2
as well if there ever was one. I have always wanted to experiment with
it and if packet is pretty much dead then there is probably no problem
with me doing some stuff on two meters around here. Especially if I
could find some kindred spirits who shared some of my interests.

Over here, classic packet radio and TCP/IP over packet radio are
completely dead. The only thing left is APRS on a single channel
on 2m and 70cm. There still are digipeaters optimized for APRS
and often with a connection to Internet, but all the NET/ROM nodes,
BBS systems, DX-clusters etc seem to be turned off.

Is that the KISS code or the original TNC2 firmware?

I should have the source for the KISS code somewhere, but I am not sure
if I can still get at it. (it may be on backupmedia for which I no
longer have a drive connected)

By "over here" I assume you Europe, yes?

Actually, neither, althought I wouldn't mind having the original TNC2
source as well as what I want to play with will require changes to
that code as well.

The "Howie Code" was a different kind of connection code much like
NETROM but it actually preserved the originators callsign from end
to end. It is what ran in the DR100 and DR200 digipeaters from PACCOMM.
I ran a couple of them doing dual band gatewaying and providing rather
extensive coverage from a mountaintop in New York (north of NYC) for
several years in the early 80's. I always thought that it was never
given a real chance to show its capabilities or develop.

I imagine everyone has a copy of the KISS source. :-)

My desire is to use software that already existed at the time the packet BBS's were coming into being. These other methods were never given any consideration either although I had some luck with my early experimentation. BUt ham radio has always suffered from a bad case of NIH syndrome which frequently results in a lot of effort being directed away from what might have been a very good solution to a problem. Of course, at this point it is all academic and little more than "proof of concept" experimentation. I see little liklihood that anything would revive packet radio even if it still has practical uses.

Ok, I played with some TNC clones but as my main interest was with
TCP/IP which had to use KISS mode, and KISS mode performed very poorly
on busy channels (which we had in those days), we quickly formed a
group and designed an SCC card with external modems, plus modem that
worked with it. This meant the PC had full control over the radio
and the TNC was no longer required. So I have little expertise on
TNC firmware.

> My desire is to use software that already existed at the time the packet

In those days I wrote software that emulated a TNC on a virtual COM port, so it was possible to run an early BBS (W0RLI, AA4RE) on our SCC cards. Later I wrote an emulator for the G8BPQ hostmode, allowing newer BBSes like F6FBB to run in multiuser mode. All the software ran on a single PC with DOS, Desqview (multitasker), QEMM (memory management) and performed as a NET/ROM node, IP router, BBS and DX cluster.

I did digipeating and played with IP quite a bit but it saw much
resistance around here and I wasn't interested in playing politics.
When I first moved back to Northeastern Pennsylvania my job was to
put the first University (actually, the first anything) on the
Internet. Gave me a lot of leeway. I had a connection between my
house and the University that provided Internet access in the late
80's before was even one ISP. I used to love going to ham club
meetingsd and listening to all the people discussing why it was
technically impossible when I was already doing it. :-)

Yeah, there really were good old days. I always enjoyed ham radio
more over there than here. And other than wanting to experiment
with packet again I think I will be brushing up on my CW and will
probably not even hook a microphone up to any of my rigs.

I think you mean PIxVRZ (PI1VRZ/PI8VRZ etc).
They have remained active very long but I think they are off the air.

Or you mean PA0VRC, a local amateur that has moved to another part
of the country but is still alive and kicking.
He built the local 2M repeater PI3PYR in 1977 or 1978 with some friends.

> I did digipeating and played with IP quite a bit but it saw much

We had so many channels allocated to packet that it was possible to
separate the traffic. A channel for local chat, one for the BBS,
one or two for the access of the local node, and then separate channels
for the interlinking of all the nodes.
This was part of the reasons why TNC's were no way to go and we needed
those SCC cards. Larger systems typically had between 8 and 12 channels.

I had UUCP at work, and later when Linux became available also at home.
Internet came later (1994 or so) and was time-tariff so it was not so
attractive for radio related applications. Not to mention that it was
strictly forbidden to make a connection between amateur radio and the
telephone network.

> bill
> KB3YV formerly DA1WO (1978-1979 just east of Venlo)

Ah, probably stationed in Germany. We had a local airbase (Soesterberg)
here but it is now closed. I worked next to it for a couple of years
and remember the overflying F15s.

Nope, PA0VRZ from Apeldoorn. Bulletin station for "vereniging van
radio-zend-amateurs". I used to copy the bulletins on RTTY and
even talk with them once in a while.

Yeah, we had plenty of channels, too. But that never got in the way
of politics. I started running IP on an unused frequency and still
got complaints about it not belonging on ham radio. (And I probably
shouldn't even go into the local Army MARS fiasco. :-)

UUCP is exactly what I was talking about. I was doing UUCP long before
the Internet opened up to the public. I once ran UUCP between a couple
TNC's to see how it would work and it wasn't bad. Basicly it already
had email and Netnews so I had a hard time seeing what was accomplished
by writing yet another BBS system (we had dozens of them on the phone
as well, but they were never as well connected as UUCP.)

Ok the VRZA clubstation. It is now called PI4VRZ. They are active
weekly on saturdays (after the holiday break) 0900 UTC.
The main operator Ron PB0ANL was also active in the packet group that
ran PI1VRZ/PI8VRZ.
I listen to their bulletins weekly on 2M. You can also listen on
Internet at www.pi4vrz.nl

The problem was that UUCP ran on Unix, and Unix was an expensive system
requiring a high-end machine that only some lucky people had.
The average HAM had at most a 286 PC, and that was already in the
later years (1990), before that it was an 8088 system.
In those days I had an Atari ST (68000 system) and many packet users
had a Commodore 64.
In december 1992 I assembled a 386 system with 16MB memory, 800MB disk,
1024x768 graphics card and 17" monitor, paying about $3500 for it.
I installed Linux on it. Then I could run UUCP from home!

> When I saw your call I had to run and take a quick look at my logbook.
> But it was PE1CHS that I worked. But, you never know!!!

He lived very close to here but I think he is no longer active.

PE1 calls are "technicians license" (no morse code) and originally
that meant "VHF-UHF only". PE1CHS was a DX-er, maybe you worked him
while in Europe.
However, after 2002 or so (don't remember exactly) the morse code
requirement was dropped and all PE1 calls are now allowed to use

HF as well.
I have never been active on HF, but I have used amateur satellites
before I moved in 1995 and had to take down the yagi antennas.
Both SSB and packet satellites.

Bill-

I am over seven years into retirement, and my memory is getting a bit dim. I have an old PK-232 stashed somewhere. Many times I have thought about firing it up, but haven't found time yet. I would need to build some adapter cables first!

At one time I had 2 PacComm TNCs with "The Net" firmware, connected back-to-back between the 144 and 220 MHz bands.

I recently reprogrammed an old FM rig that had 441.000 MHz in it from back in the 90s. My notes indicate that was a Packet Backbone frequency. Sure enough, I can hear a steady chatter of packet signals there. I'm listening through a magnet mount antenna stuck to the top of some metal shelves, here in central Florida.

According to the FCC, N2WX renewed in May, and is living in Sarasota, FL. You might take a look at <http://www.tapr.org>. If you search

their archives for N2WX, you will find several related articles. Their software library is at <http://www.tapr.org/software_library.php>.

I don't know if PacComm is still in business, but their website is on line at <http://www.paccomm.com>. A note at the bottom of the home page says "Last updated 7/19/2004".

I think Bill - what your problem is - is that you have walked away from
something and all of a sudden, you turn the radio on and you expect to
hear traffic, just like you did 10 - 20 years ago...

Up in the north, they pass traffic on two meters, at least as far as
Bingimton NY to Erie via Ridgeway PA, and they pass it as far south as
Pittsburgh PA - via the national traffic system.

The only person I know personally that is involved in Pete Carr - WW3O
You might have read one or more of his articles in QST Magazine.
I think Pete says they do it in the morning.
Not enough traffic anymore to sit there and do it all day.
I don't even know what kind of traffic they pass.
I think they only do it to keep the system up and running in case of a emergency.

If you want people to participate with - I would tone down the attitude...
There is still some good guys out there, but most of the old HAMS - pre No Code - are DEAD, and the ones that still has the radios on are not the same hams you remember from 20 - 30 years ago.

2 meters / 70 CM is unique band.
It is the first place you go when you get your license and the last place you go before they take you to the rest home or the cemetary.
Most real hams won't even use any band that is channeltized...
You are going to find that the kids on the radio today are mostly the walkie talkie crowd, who are not real hams, just want to be's. Who refuses to put up antenna's or buy transceivers or stand up to their old lady to be able to put something in or on or outside of the house.

Sounds like you have been delegated into that crowd.

Your Advanced license tells volumes.
You knew about communications but didn't see any need to go beyond Advanced and probably got mad when they eliminated Advanced and got rid of the code...
That is the consensus of the population here....

Find yourself a Amateur Radio Club and get involved in Amateur Radio - not just the walkie talkie crowd on the 565 simplex or the repeater retards...
Get out the books and study and get your Amateur Extra license and become a VE and give back to Amateur Radio - don't just take!

You will find, if you get involved - you will not feel so jilted and will be less apt to retreat to the 75 and 160 meters, with the other buddy clubs, where all they do is sit and cuss and not use their call signs and act like they are still on the CB radio...

The lack of activity in this group may more reflect the death of
Usenet than anything else. Very few Usenet sites exist outside
of Universities and commercial providers these days.

There are still people experimenting with the Internet protocols
(TCP/IP, etc) over ham radio. Little of it takes place at 1200 bps
anymore; most folk are running 9600 bps or faster, some are using
converted wireless equipment to achive multiple megabits ("HSMM"). And
there is the new 56kb/s digital radio from the folks in the northwest.
There are a lot of folks running Linux and many of these use the
soundcard in their computer as the modem - no TNC required.

For more info, check out the Linux-Hams mailing list, the TAPR
website <http://www.tapr.org> and the AMPRNet <http://www.ampr.org>.

Best regards
- Brian WB6CYT

I guess I was lucky, then. I had Unix (XENIX actually) on a M68K at
home from about 1984. Added more as time went on. We won'r even go
into what I have at home now but it ain't all PC's. :-)

And, of course, there were versions of UUCP for a lot of non-unix
computers in those days, too. MIght have even been one for CP/M.

I used to do satellites, too. Might get back into that as well, but
it takes a lot more gear and a lot more money today. I worked mostly
the HF satellites inb those days especially the russian ones.

Great nostalgia. Talking with you brings back a lot of memories.

All the best.

Let's see, I have a TNC-1, a couple of TNC-2's, a KAM, a newer version
KAM, a PACCOMM 220, a couple DR-200's and even one of those early
VE-something or others that didn't do AX.25 because it hadn't been
invented yet. :-)

Like I said, I programmed all the 2 meter packet freqs into a scanner
and let it run all day yesterday and heard nothing. I guess if everything
has moved to vhf maybe the locals won't mind if I experiment on 2 meters
again. Hmmmmmm.... What ever happend to ROSE. There was another system
that showed promise but lost out to politics.

I have tried a couple of email addresses but never got an answer.
I really don't plan on calling his house. I have asked this question
before in NetNews and other places. I would have thought he would
have seen one of these requests or had someone mention that I was
looking for him. Maybe he just dfoesn't want anyone to work with
his old code any more.

Yeah, PACCOMM is still there. I have asked them three times now and
my reply each time was, "let me look and see if we still have a copy
of the code around anywhere." That is usually the last I hear. I
fear this is yet another piece of computing histoy that may have been
lost.

OK, on what frequencies? I'm in Scranton/Wilkes-Barre. When K3RLI was
still active this place was a hot-bed of NTS traffic.

>
> The only person I know personally that is involved in Pete Carr - WW3O

I haven't seen a QST in 20 years.

> I think Pete says they do it in the morning.
> Not enough traffic anymore to sit there and do it all day.

Oh, wait. You are talking about voice or CW. I would have thought that
automated packet systems would have replaced that decades ago. But then
maybe that's what "Not enough traffic anymore to sit there and do it all
day." really means. :-)

> I don't even know what kind of traffic they pass.
> I think they only do it to keep the system up and running in case of a

Attitude? All I have said so far was 25 years ago politics kept any
attempts at improving the system out and that ham radio suffered from
NIH syndrome. Historical facts, not attitude.

And you accused me of having an attitude!!!

>
> Sounds like you have been delegated into that crowd.

What are you talking about? I use mostly tube type HF equipment that
I build myself or at laest maintain myself. (When my father died he
left a bunch of "newer" semiconductor and microprocessor based rigs
behind. None of them still work.) i build antennas for the fun of it.

Especially HF antennas. (Ever built a Sterba Curtain?) I alwys have
ropes and wires hanging from trees around my property. I may have been
out a long time, but I'm not dead.

>
> Your Advanced license tells volumes.

What is that supposed to mean? That was the level I had attained
when I stopped using ham radio. Since getting interested I have
started working on my Extra. Took the test once just to see what
it was like and only missed it by 2 questions (on all the space
stuff that didn't even exist when I was still active.) I expect
to pass it before the summer is over.

> You knew about communications but didn't see any need to go beyond
> Advanced and probably got mad when they eliminated Advanced and got rid
> of the code...

Talk about being blinded by attitude. I was one of the advocates of
eliminating the code over 20 years ago. Just because I do it doesn't
mean I expect everyone to do it. I actually did 20WPM code for 10
years before I even had a ham licence. With the Army. That was also
where I got my interest in RTTY, again long before becoming a ham.

> That is the consensus of the population here....

I guess you totally missed the fact that what I wanted to do was get
back into digital experimentation. Or the fact that I was doing
wireless networking (both ham and non-ham) 30 years ago.

Hi Brian,
Now there's a blast from the past.

> The lack of activity in this group may more reflect the death of
> Usenet than anything else. Very few Usenet sites exist outside
> of Universities and commercial providers these days.

Gee.... That's where I thought it always was. (As one who used to
run a pretty good Usenet Site at a University until they turned me
off for "using too much bandwidth". :-)

>
> There are still people experimenting with the Internet protocols
> (TCP/IP, etc) over ham radio. Little of it takes place at 1200 bps

Certainly haven't found any around here.

> some are using
> converted wireless equipment to achive multiple megabits ("HSMM"). And

That was something I wanted to do. Wondered if one could change the
code in the box (I have a bunch of boxes with third party code based
on Linux available) to make them run AX.25. Seemed like one could
set up some pretty good high-speed point-to-point links with the WAP
boxes.

> there is the new 56kb/s digital radio from the folks in the northwest.

New as in different from the GRAPES stuff that was coming out about the
time I stopped having the time and money to play with it?

> There are a lot of folks running Linux and many of these use the
> soundcard in their computer as the modem - no TNC required.

I've seen that, too. But end user devices was never my main interest
I was always much more interested in the backbone.

>

Not much on mailing lists. Been to the TAPR site but it basicly read
like 1990 all over again. But then, I didn't really get past the intro.
I'll check out th AMPR site.

>

He's pretty much retired these days; I believe he's mostly into science education (speaking at high schools and junior colleges) these days.

Last time we had dinner a few months ago he was real excited by near-space balloon flights and using ham radio to relay video and telemetry. One of his high-school groups had just had a rather successful flight and collected some interesting data and video.

The HSMM folk have found that some brands of WAP can be told to operate in the ham bands (2.4 and 5.8 GHz) at increased power and are using them for high speed data links, both digital voice and data. And of course there are the D-Star folk with their medium-speed digital links. There is interest in Internet linking in both groups. A Google search on "HSMM" will probably yield some informative info.

I regret to say that the www.ampr.org site is rather sparse right now, as we just rebuilt it, but I hope to add more to it as the months go on.

Best wishes!
- Brian

Thanks for the info. I will definitely look into some of this, especially
the WAP stuff as I have a bunch and really like playing with them.

If you see Phil again tell him I said "Hi" although I doubt he will even
remember who I am. (Not sayinghis memory is bad, just that I tend to be
that guy no one remembers. :-)

All the best to everyone on the left coast. It's been 25 years since
I was last that far west.

bill

> I wonder why the callsign change?

At some point it was decided that all club stations would have a
PI4 prefix, and the existing PA0 calls were changed to PI4.

PI prefixes with other digits are/were used for repeaters, nodes, bbses
and other special applications.

Later a vanity callsign system was introduced and now all prefixes
from PA to PH are used by radio amateurs, and PI for special stations.

> I used to do satellites, too. Might get back into that as well, but
> it takes a lot more gear and a lot more money today. I worked mostly
> the HF satellites inb those days especially the russian ones.

Not having a HF license, I set up a azimuth/elevation controlled set
of crossed yagis and later added computer control. Convenient for
the low orbiting packet satellites (that no longer exist). My
station could completely automatically find the next satellite that
would pass (out of 6 or so that were active), turn the yagis, set
the frequencies of the transceivers, watch for the corresponding
callsign to appear on packet, and upload/download the files that
were queued. It was like satellite UUCP :-)
Neat to build it and to watch when it was all running... but boring
after a while.

> Great nostalgia. Talking with you brings back a lot of memories.

Yes, great! It was a nice time and good memories remain.

73/55,
Rob

Bill, good to have you back involved with Ham Radio. You'll find that things have changed, but there is a lot of exciting new things to have fun with.

Unlike some others, I don't sense any attitude other than "where are we now"? And that's a reasonable question. In PA and South NJ, APRS is the what's hot now. There is some DSTAR activity, but in general, Packet Radio in any given area is very sporadic and usually club-oriented.

Unlike the early 90's when we were all playing with Phil Karn's KA9Q, full-time connectivity to the Internet is the basis for support communications. DX cluster are mostly web-based, although you can connect to quite a few vie Telnet. The biggest reason for the Internet is to write logging data to sites like HRDlog.net or to map digital propogation via pskreporter or wsprnet.

So Ham Radio is a bit different with HF digital being the thing most highly developed now with modes like JT65-HF, PSK31 and Olivia. Even RTTY has experienced a resurgence in interest. Amsat is suffering with most of it's mainstay birds being off the air. QRP CW on the WARC bands like 30 and 17 is a hot area, one that I enjoy quite a bit. SSB is the usual collection of what-have-you. Sometimes great, sometimes decidedly not.

But the main point being, there is a lot of digital activity being enjoyed on HF these days. It seems to be in sync with the connected, digital media world that we live in, so no real surprise. As for age? Yes the older Hams who got their starts in the late 50s are into retirement now and have moved into homes that may not support large antennas, so QRP and digital or CW are their realm. Is there a reason to connect with a TNC on VHF anymore? Not really.

Anyway, welcome back into the hobby. It may not be the same as you remember, but if you bought a Yaesu 817ND, ran it into a random wire via an LDG automatic tuner, and connected it to your PC via a West Mountain Rigblaster, you can have as much fun as I do on PSK31, JT65-HF or CW as I do.

Board of Directors Election

Three Director positions on the TAPR board of directors are now open for nomination.

Nominations may be submitted now. Visit http://www.tapr.org/tapr_elections.html for information about what being a TAPR director entails and to place your nominations (please use plain text when placing a nomination).

Nominations close with the call for nominations from the floor at the DCC TAPR Membership Meeting on September 22, 2012, and an online election will be held at http://www.tapr.org/tapr_elections.html from September 29 to October 12, 2012.

The three Director positions that are up for election are currently held by Scott Cowling, WA2DFI, John Koster, W9DDD, and Mark Thompson, WB9QZB.

The TAPR Board of Directors meet online 24/7 and in person twice a year:
at the Digital Communications Conference (DCC) and the Dayton Hamvention.

With that in mind, all TAPR members are invited to attend the in-person
TAPR Board of Directors meeting on Thursday, September 20, 2012, 9 AM to
5 PM (with a lunch break) in the Executive Board Room at the Sheraton
Gateway Hotel Atlanta Airport, which is the site of the 2012 TAPR-ARRL
DCC, September 21-23.

The DCC is a done deal, so now is the time to put your thoughts about
the DCC down on paper and submit them to the TAPR PSR desk for inclusion
in the next issue of TAPR's quarterly newsletter. Photos are good, too,
as well as anything else you wish to write that is ham radio digitally
related.

The deadline for the next issue of PSR is October 15.

Thanks and 73,

Stan Horzepa, WA1LOU'
PSR Editor

REPORT TO THE FEDERAL COMMUNICATIONS COMMISSION ON EXPERIMENTS CONDUCTED BY PAUL NEWLAND AT AMATEUR RADIO STATION AD7I USING THE ERROR CORRECTING PROTOCOL DESCRIBED BY CCIR RECOMMENDATION 476-2

ABSTRACT

This report outlines the use of the teleprinter code described by CCIR Recommendation 476-2, also know as AMTOR, by amateur radio station AD7I. Use of this code during the period provided by Special Temporary Authorization (S.T.A.), file 7130, was hampered by external influences. No "scientific" data were collected but outstanding performance provided by the CCIR 476-2 coding was observed by the operator on numerous occasions. The report concludes with a recommendation that use of CCIR 476-2 coding by U.S.A. radio amateurs be allowed as soon as possible.

DISCUSSION

This report describes use of the error correcting protocol described by CCIR Recommendation 476-2 at my amateur radio station, AD7I, during the period of May 1982 to November 1982. During much of the experimental period, the High Frequency (HF) station was inoperative because of radio problems. Additionally, I was required by business commitments to make several unexpected and lengthy trips during the fall. Consequently, time did not permit scientific data, per se, to be collected for presentation. However, I have formed strong opinions about the usefulness of this mode of communications based on my use.

In May of this year I completed construction of a microprocessor system to convert the CCIR 476-2 signals to international telex teleprinter code. The firmware to accomplish this code conversion was provided by Mr. Peter Martinez, G3PLX; I designed the controller to be software compatible with Mr. Martinez's firmware. An additional microprocessor system was designed and built by me using a different manufacturer's microprocessor. I programmed this second microprocessor to convert CCIR 476-2 Mode B to international telex teleprinter code. I also purchased a new HF-SSB radio to perform experiments with CCIR 476-2 coding. All other equipment was previously on hand.

After completing the controllers, U.S. Coast Guard and Canadian Coast Guard weather broadcasts were monitored to observe the print quality of Forward Error Correction (FEC) mode B communications during normal HF propagation conditions. In my opinion, without scientific data to back my

claim, I feel that the FEC mode of operation for broadcast use is superior to that of conventional stop-start unprotected teleprinter transmissions (RTTY). A major advantage of CCIR 476-2 coding in FEC mode is that detected errors are converted to space characters by the code converter. Hence, errors are easily and quickly spotted by the operator so fills can be made from context.

On June 1, 1982, I advised the Commission's field office that on or after June 11, 1982, station AD7I would begin transmissions using CCIR 476-2. On June 13, 1982, contact was established with station TI3DJT using the Automatic ReQuest for repeat (ARQ) mode A. From June 13 to 29, 1982, 39 contacts were made with radio amateurs around the world using CCIR 476-2 coding. Most of the contacts were made with ARQ mode A; only several contacts were made using FEC mode B. All contacts took place on or near 14.075 MHz. Stations with which communications took place were: TI3DJT, PA0RYS, HB9AUK, HB9AK, K4PA, G3PLX, A4XFW, G3RYS, KB6BT, KC7KK, and TI2CC. On June 30, 1982, the station's radio was returned to the manufacturer for repair under warranty. The synthesizer provided unreliable operation after the radio had been on for several hours.

On September 28, 1982, the radio was returned in good working order. >From September 28, 1982, to November 14, 1982, another 31 contacts were made. In my opinion, again without scientific data to back my claim, performance using CCIR 476-2 ARQ coding is VASTLY superior to conventional RTTY coding. CCIR 476-2 displays an amazing robustness during conditions of propagation that render SSB and CW modes of communications virtually useless. I apologize for not having scientific data to back my claims; I am sure that the data would substantiate my opinions. CCIR 476-2 consistently provided communications during short and long duration frequency selective fading, during SSB and CW co-channel and adjacent channel interference, and during conventional Radio Teleprinter (RTTY) interference. The only interference to which CCIR 476-2 is not immune, as one might expect, is another co-channel CCIR 476-2 station. Such stations did not present much of a problem during the test period. However, it is important to note that there were few stations available to cause inadvertent or deliberate interference.

IMPLEMENTATION

CCIR 476-2 proves to be a simple addition to an amateur radio HF RTTY station. Figure 1 shows how the system components were configured at station AD7I. The cost of the CCIR 476-2 code converter was about $40.00 due to a well-stocked junk box. If all components for the controller were purchased new and the firmware was free, the cost for a code converter should still be well under $85.00. This is a small amount of money compared to other system components. Vast sums should not be required to implement a CCIR 476-2 code converter.

CONCLUSION

The performance provided by CCIR 476-2 coding is superior to conventional coding, and the incremental cost to add that capability to an amateur radio RTTY station is low. I therefore recommend that the Federal Communications Commission allow, as soon as possible, the use of CCIR 476-2 coding by radio amateurs who now have RTTY privileges.

Respectfully submitted,

Paul Newland, licensee of
Amateur Radio Station, ad7i

Holmdel, N.J. 07733
201-949-3731 (W)
201-741-1151 (H)
November 23, 1982

Mr. Paul Rinaldo, W4RI
Editor,
_Q_E_X: The ARRL
Experimenters' Exchange
1524 Springvale Avenue
McLean, V.A. 22101

Dear Paul:

In the spring of this year at the packet radio meeting held in Murray Hill, you and I discussed some of the regulatory problems facing the development of a high frequency data network. One key problem was the legality of running a H.F. packet station in unattended mode, where unattended implies operation of a radio without a control operator present during transmissions. Without releasing amateurs from the requirement that all H.F. transmissions must be supervised by an operator, automated H.F. networks are impossible to achieve.

On July 7, 1982, I made a request of the F.C.C. to allow operation of my station, using the error correcting teleprinter code know as AMTOR, without a control operator being present. I was delighted on November 19, 1982, with a positive response from the F.C.C. Although not everything I requested was allowed, I was pleased to find that I got more than I thought I would. I can now run unattended on H.F. with AMTOR.

I encourage everyone involved with the establishment of automated data networks using H.F. to seek waivers of the rules, as required, to permit the rapid and continual growth of this technology. Amateur Radio is progressing!

With enough power and weak signal modes you can use the geostationary
broadcast satellites as passive reflectors .
